

Gentleman, This current attempt from the National Association of Broadcasters to halt the services provided by satellite radio should be viewed as an attempt to stop what they cannot control. I feel first that since satellite radio is a subscription service it is outside their realm of control, and second the services offered by the satellite radio being in a 24 hour format provide valuable information for those of us that are not in the normal 9 to 5 world of regular radio.

Thank you for your time,

Walter Bourland
